RE: Marcin Kierdelewicz recommendation

To Whom it may concern,

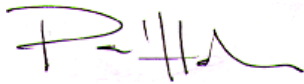

I would like to give my recommendation for the work of Marcin Kierdelewicz and his development team.

Marcin, made contact with me via my website. It is common for suppliers to contact me and I usually ignore them, but Marcin seemed to know what he was talking about and he seemed like a nice guy too. But I really knew nothing about him, in these days of anonymous online communications you really have no idea what is real or what is another Nigerian scam, so it pays to be sceptical. Marcin persisted and he gave me a fair quote, with no obligation for some Joomla programming. So I took the leap and decided to commission the work.

Well, it was sure worth it. He got back to me with the first version the next day, (we live in different time zones). The programming did everything I asked it to do, and it turned a pretty ordinary jobs board into a great one (see www.itwire.com.au) . After testing with some of my clients they came back with a couple of recommendations. They were minor changes and Marcin was happy to accommodate, and re-supplied again the next day! Perfect.

I recommend that you give Marcin and his team a go, and you won't be dissatisfied.

Sincerely,

Paul Hosking
Creative Director
