RE: Marcin Kierdelewicz / Mambo Assistance / Mega.com.pl

To Whom it May Concern,

This letter is my personal recommendation for Marcin Kierdelewicz of Mambo Assistance / Mega.com.pl. I have had the pleasure of working with Mr. Kierdelewicz for several months. I highly recommend him and his team of programmers and Web developers.

I found Marcin online through his Website MamboAssistance.com and requested his help with several Mambo programmed sites that were left unfinished by a very incompetent programmer. Marcin and his team immediately took control of the situation and helped me save my clients and my company from what could have been a total disaster. They worked closely with me to get these sites up and running without missing a deadline and while still staying within budget. My clients and I are extremely grateful for their quick action in retrieving files that were in danger of being deleted by our previous programmer. And in fact, were deleted just hours after Marcin's quick action saved the day!

I've been reluctant in the past to outsource work overseas mainly because of the language and cultural barriers. I thought it would be difficult to convey ideas with a non-US associate. But with Marcin, I found this not to be a problem. It was like he was working in the next office.

I highly recommend Marcin Kierdelewicz and his team at Mega.com.pl. I plan on using their services to benefit my clients for years to come.

If you have any questions regarding this recommendation, please feel free to call me at our office (253) 677-4384.

Best Regards,

Vera Randall
Owner/Web Development Director
